TANTIA UNIVERSITY

SYLLABUS

OF

DIPLOMA IN RADIATION TECHNOLOGY - DMRT12

DIRECTORATE OF DISTANCE EDUCATION
### Eligibility

Eligibility : 10+2 with PCB/PCM

### Programme Duration

Programme Duration : 2 Years

### Programme Objectives

Programme Objectives : Radiography is the art and science of producing medical images using x-radiation. Technologists produce images for the radiologist's interpretation to aid in medical diagnoses. The program prepares you, under the direction of a medical specialist (radiologist), to work in the hospital medical imaging department, at the patient’s bedside, in the operating room or Emergency or in private imaging clinics. Our Diploma program in Radiography Technology has been designed to integrate the academic environment with the clinical setting. We are one of the few premium institutes in India to offer this program.

### Job Prospects

Job Prospects : Upon successful completion of the Diploma you can explore a career as a radiologist technician. You will find ample opportunities in Hospitals, Clinics and Doctors’ offices. You may further pursue a bachelor’s degree to continue your education and specialize. Common job profiles of students after completing DRT include: Technician in Hospitals, Nursing Homes and Diagnostic Labs.

**PATIENT CARE RELEVANT TO DIAGNOSTIC RADIOLOGY- RAD12201**

<table>
<thead>
<tr>
<th>UNIT</th>
<th>CONTENTS</th>
</tr>
</thead>
</table>
| 1    | **Radiological Contrast Agents:**  
       Opaque agents and gases-  
       Relationship of x-ray transmission to density and atomic number of the elements of contrast medium.  
       Types of Barium Sulphate Solutions, Concentration and its particular uses, Flavouring agents. |
| 2    | **Iodine Preparation:**  
       Organic compounds, Water - soluble group; Significance of iodine content, Proprietary preparations, Iodised oil, Application of various systems of human body , Volume, Contra-indications, Methods of administration and route. |
| 3    | **Iodine Preparation II:**  
       Sensitivity test, Side effects and management, Elimination from the body.  
       Gases- Air, Oxygen and Carbon dioxide application and dangers. |
| 4    | **Emergencies in the X-ray Department and Management:**  
       External defibrillation, Direct cardiac massage, Internal defibrillation  
       Complications-  
       Cardiac arrest, Respiratory arrest. Bronchography  
       Local anaesthetics-  
       Reactions, Treatment. |
| 5    | **Special Procedures in Diagnosis Radiology:**  
       The Gastro intestinal tract-  
       Barium meal, Barium swallow, Small bowel enema, Barium enema  
       The Renal tract-  
       Intravenous urography, Intravenous cholangiography, Operative and post operative cholangiography, Percutaneous transhepatic cholangiography. |
| 6    | **Special Procedures in Diagnosis Radiology-II:**  
       The Respiratory tract-  
       Bronchography, Gynecology, Hysterosalpingography  
       Cardio Vascular System-  
       Angiography, Aortography, Cerebral angiography, Splenoportovenography |
The Lymphatic System-
Lymphangiography
Central Nervous System-
Myelography, Sialography
Ultrasound +Guided procedures
General preparation, Care
CT scan+guided procedures
Safety measures
MRI.

| 1    | **Radiography:**
|      | Primary radiological image produced by Contrast Media Attenuation |
|      | Linear and Mass Attenuation |
|      | Coefficient factors affecting attenuation |
|      | Application in radiology |
|      | Filters-
|      | Inherent and Added Filters, Heavy metal filters |
|      | X-ray beam restrictor aperture diaphragm cones and cylinder collimators |
|      | Function of restrictors. |
| 2    | **Scattered Radiation:**
|      | Significance of Scatter Grid principle- design and type |
|      | Evaluation of grid performance lead content |
|      | Grid cut off |
|      | Moving grids |
|      | Grid selection |
|      | Air gap technique. |
Fluoroscopy Equipment:
- Direct fluoroscope
- Image intensifier design
- Brightness gain
- Imaging characteristics
- Multi field image intensifiers
- Close circuit television scanning- Television image quality
- Fluoroscopic image recorder
- TV image records.

Radiographic Image:
- Image clarity contract
- Factors affecting contrast
- Image quality
- Mottle sharpness and resolution
- Line spread function, Modulation transfer function
- Noise and wiener spectrum
- Magnification Distortion
- Penumbra unsharpness
- Inverse square law
- Evaluation of resolution
- Quantum mottle patient exposure.

Body Section Radiography:
- Basic methods of Tomography, Terminology, Blurring section thickness, Narrow and Wide angle Tomography, Circular Tomography.
- Topographic motions
- Phantom Image Tomography
- Angel Determination.

Hospital staffing and organization, Records relating to patients and departmental statistics, Professional attitude of the technologist to patient and other members of the staff, Medico legal aspects, Accident in the department, Appointment, Organization, Minimizing waiting time, Outpatient and follow ups to clinics, Stock taking and Stock keeping. |
| 2    | **Care of the Patient:**  
First contact with patients in the department, Management of chair and stretcher, Patients and aids for this, Management for the unconscious patient, Elementary hygiene, Personal cleanliness, Hygiene in relation to patient (for example clean linen and receptacles), Nursing care, Temperature, Pulse and Respiration, Essential care of the patient who has a Tracheotomy, Essential care of the patient who has Colostomy, Bedpans and Urinals, Simple application of a Sterile Dressing. |
| 3    | **Aims and Objective of First Aids:**  
Wounds and bleeding, Dressing and bandages, Pressure and splints, Supports etc., Shock insensitivity, Asphyxia, Convulsions, Resuscitation.  
Use of suction apparatus, Drug reactions, Prophylactic measures, Administration of oxygen, Electric shock, Burns, Scalds, Hemorrhage, Pressure points, Compression Band, Fracture, Splints, Bandaging, Dressing, Foreign bodies poisons. |
| 4    | **Infection:**  
Bacteria their nature and appearance, Spread of infections, Auto infection or Cross infection, The inflammatory process, Local tissue reaction, General body reaction, Ulceration aspects and Antisepsis. |
| 5    | **Principles of Asepsis:**  
Sterilization, Methods of sterilization, Use of central sterile supply, Departmental care and Identification of Instruments, Surgical dressings in common use including Filament Swabs, Elementary Operating Theatre procedure, Setting of trays and trolleys in the Radiotherapy Department. |
| 6    | **Departmental Procedures:**  
Department staffing and organization, Records relating to patients and departmental statistic, Professional attitude of the technologist to patient and other members of the staff, Medico legal aspects, Accidents in the department, Appointment, Organization, Minimizing waiting time, Outpatient and follow ups to Clinic, Stock taking and Stock keeping. |
| 7    | **Drugs in the Department:**  
Storage, Classification, Labeling and checking, Regulations regarding dangerous and other drugs, Units of measurement, Special drugs, Anti Depressive and Antihypertensive etc. |

**LEARNING SOURCE:** Self Learning Materials
